## **MEMORANDUM**

**TO:** Paul McCulla, County Administrator

**FROM:** Frederick P.D. Carr, Director

**SUBJECT:** Business & Public Facilities Review Team

**DATE:** March 27, 2006

cc: Bryan Tippie, Director, Budget Office

Board of Supervisors 2005 Goal: Improve the process for approving and expediting commercial and industrial development (i.e. site plan approval process).

1. *Direction*. It is clear that the Board of Supervisors has raised its expectations for the level of service in 2006 in all actions associated with business development. It wants a streamlined and efficient approval process that allows buildings to be constructed more quickly and the business tax base expanded.

In both FY 2005 and 2006 budget preparations, the Department based its new staff requests on the premise that as work volume increases the requisite staff resources would be approved to at least maintain the same level of service. In calendar year 2005, the process for major site and construction plans was subjected to a significant overhaul, requiring different review procedures and submission deadlines for projects in their subsequent resubmissions. As a result of the process upgrade and escalating inspections workload, the Department also submitted five discrete staffing initiatives for the FY 2007 Budget through the County's process, with four that failed to make it for Board of Supervisors consideration.

The Board of Supervisors has made it clear that for non-residential business development applications (commercial, industrial, office, retail and associated uses, as well as County school and park projects) it has a higher level of service expectations: (a) more proactive involvement of staff in working with the applicant and its design team from the preapplication meetings through its review, options identification and project refinements to final approval; (b) establishing a priority review process that is more problem solving and collaborative in nature; (c) priority focus placed on the comprehensiveness and quality of the County review, report timeliness and applicant resubmissions (objective: reduce the total number of resubmissions); and (d) increased and more directed staff communication levels to both the applicant and its design team regarding deadlines, report findings and a clear road map to plan approval.

In a March 21<sup>st</sup> meeting with you, Supervisors Graham and Downey, the Department was requested to submit a staffing proposal to achieve this Board goal.

2. Directed Assistance Review Team (DART) for Business Development: Under the Assistant Director, the assigned core group of experienced Department personnel shall include a Senior Planner (Zoning Office), Assistant County Engineer (Engineering Office) and Senior Planner (Planning Division). Their principal and first priority is to handle pre-application meetings, complete coordinated staff review reports, proactively communicate and collaborate project refinements with the design team and handle all aspects for business development (non-residential) and public facilities (e.g., airport, library, parks and recreation, schools, and solid waste). New staff identified herein will be needed to enable this effort to occur by assuming all other land development application categories and their review, field inspections and associated division responsibilities the DART team members.

| Position                        | Grade | Division           | Salary Cost |           |

Funding: Needs to be noted that the proportion of funding support for new positions has changed radically since FY 2004. At that time, 60 percent of the Department's budget was supported through fee revenue, while 40% came from "local support". The following represents the proportional decline in local funding support. Here are the subsequent budget percentages: FY 2005: 70% (Revenue) and 30% (Local); FY 2006: 78% (Revenue) and 22% (Local); and Proposed FY 2007: 79% (Revenue) and 21% (Local). As a result of the current FY 2007 Budget, The Department intends to submit for public hearing an updated Fee Schedule for public hearing and Board of Supervisors consideration. Based on that update, our fee revenues in the proposed FY 2007 have already been increased ± 12 percent from \$2,093,494 to \$2,337,314.

To cover this personnel addition for DART would require a total fee revenue increase close to 25 percent. Under existing development and revenue trends, we have difficulty predicting revenues in excess of the \$2,337,314.
